

Outfeed rollers, SKR-/BKR-600

To improve the extraction of cants in SKR-/BKR-600 and to get a better steering trough the sawblades in KS-122/124 it is now possible to install driven outfeed rollers between the machines.

The outfeed rollers are fitted after the guide rails on the Chipper canter and are driven by geared motors.

If you need more information please contact AriVislanda After Sales department.
