

Sawcommander QSS-300

- ✓ For higher yeild
- ✓ High measurement accuracy
- ✓ Higher speed
- ✓ Better accessibility

The QSS-300 is a double-arbor circular saw that can be placed as a rotary gang saw, close coupled with chipper canter or as a free standing with centring feedwork.

The QSS-300 is developed for the futures increased demand on economy, high efficiency, availability, service friendliness and easy maintenance.

The QSS-300 can handle both straight and sweep sawing.

The QSS-300 comes in two variants, one with fix cutting pattern with up to 7 sawn pieces, the second variant have four shifting saws and give the possibility up to 5 sawn pieces. All sawblades are fully settable down to 16 mm. A fix cutting pattern w

Horizontal adjustment of the top arbor saw is possible during operation.

Setting of cutting pattern can be done both by hydraulic or electrical servo

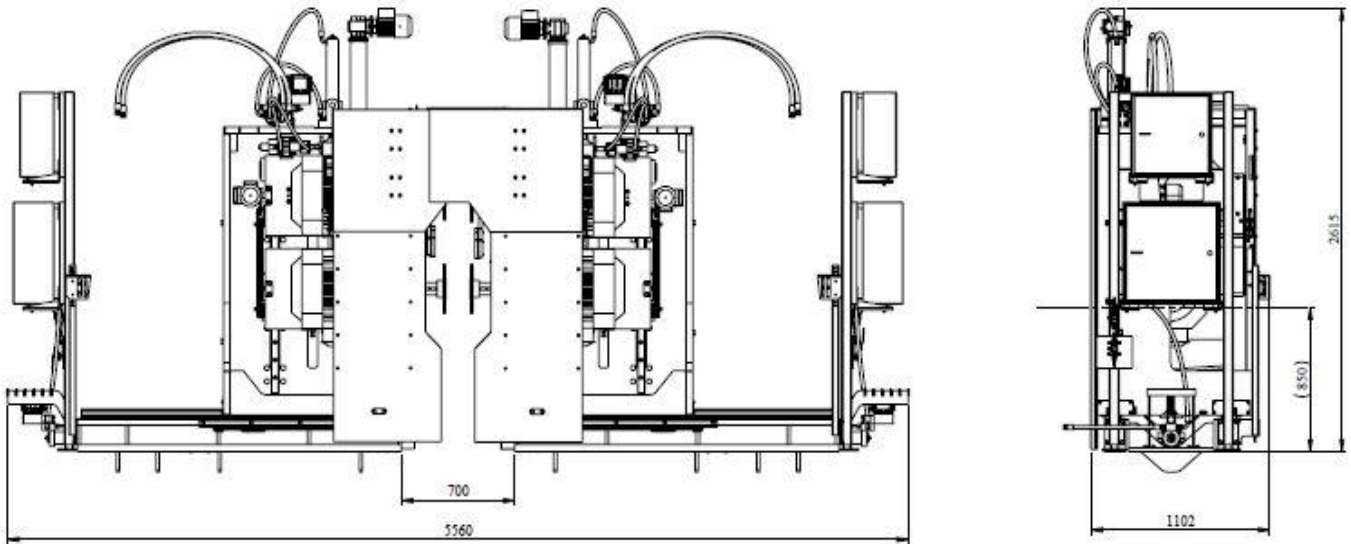

QSS-300

- Variable choice of blade diameter between $\varnothing 480 - 570$ mm, makes it possible to optimize the width of the sawblades depending on the cant height

Dimensions

Tekniska data

Max feed speed.....	180 m/min
Max cant height	300(400) mm
Sawblade diameter.....	480-570 mm
Distance between inner-outer sawblades.....	16-90 mm
Max opening between inner sawblades.....	1500mm
Power requirement 2-4 sawblades.....	4x 55-90 kW
RPM saw arbor.....	3000 rpm
Weight.....	ca 11 ton
