

# Cant turner CT-2S

- ✓ Proven design
- ✓ Good function even for small cants with rough edges
- ✓ Electric servo drive

For laying of 2-sided reduced cants.

**Cant turner CT-2** can turn the cants both ways, either clockwise or counter-clockwise, which ensures optimal function at every sawmill.

The clamping rollers are hydraulically operated and one has an electrically driven motor.

The center of rotation is adjusted in height with a hydraulic cylinder to match current cant dimension.

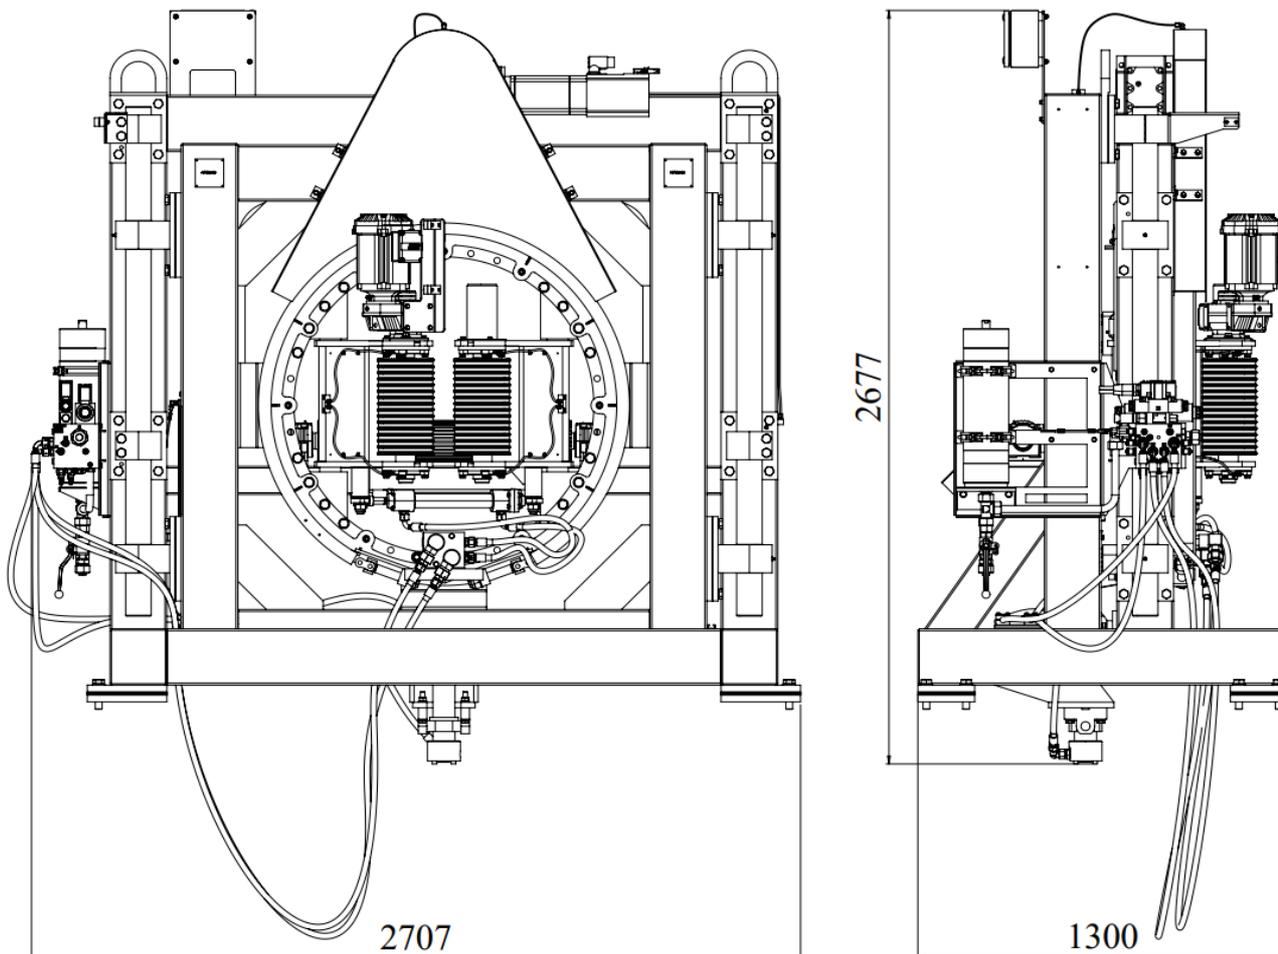

# CT-2S

- 90° laying of two-sided reduced cants
- Turning speed adjusted according to feed speed

## Measurements

## Technical data

Max feed speed .....	150 m/min
Min log length .....	2,4 m
Min log gap .....	ca 0,3 m
Max/Min log diameter (enclosed) .....	600/100 mm
Capacity .....	app 35 pcs/min
Weight .....	app 2,5 ton
