

Merry-go-round conveyors

- ✓ Saves space
- ✓ Resource effective sawline

Merry-go-round conveyors is an effective system to use when space or budget is limited.

The log is fed in a loop, enabling multiple passes through the same machines, ensuring maximal utilization of the capacity of the machines. Layout of the loop is adjusted to customer specific conditions and options.

All conveyors have electric drive. Moving components are available with pneumatic (standard) or hydraulic actuating.

Power requirement

Roll conveyors.....	3,0 kW
Belt conveyor	5,5 kW
Side conveyors.....	3,0 kW
